Bachelor of Technology in Electronics and Communication; GPA: 8.25 *Oct 2021 – May 2025*

PROJECTS

- **User Access Management System | Node.js, PostgreSQL, TypeORM, JWT**
 - **Role-Based Access Control:** Built a **secure access management system** supporting **3 user roles (Admin, Manager, Employee)** using **JWT-based authentication** and middleware-protected APIs.
 - **Request Workflow:** Implemented an **end-to-end access request workflow** allowing employees to request software access and managers to **approve or reject requests** with status tracking.
 - **Database & APIs:** Implemented **TypeORM** data access framework for enterprise-grade PostgreSQL integration with normalized schemas and enforced relational constraints
- **Live Polling | React, Node.js, Express.js, Socket.IO, Tailwind CSS**
 - **Real-Time Sync:** Built a real-time polling app supporting 2 user roles with live sync under 100ms latency.
 - **State Management:** Engineered real-time data management system for 20+ concurrent users with sub-100ms latency; implemented batch state synchronization using Redux and WebSocket across 60+ poll timers.
 - **Auth & APIs:** Integrated **Firebase for session storage** and designed Express.js APIs for **role-based access control**.
